

## Blending Corn Syrup with Powdered Sugar and Sand

**change** How You Think About Mixing and Processing

Resodyn Acoustic Mixers' second generation technology, **LabRAM II**, provides up to 1 kg payload capacity and advanced control features. Virtually any combination of liquids, powders, pastes, and gases can be processed faster, better, more efficiently, and more productively using the **LabRAM II** bench-top mixing systems and accessories. ## Loaded Polymer Blending with RAM

To illustrate a heavily loaded polymer blend, two different material sizes of powdered sugar and sand were blended with corn syrup (polymer surrogate). The top image to the right shows the starting materials while the image on the bottom shows the results after mixing.

The starting materials were 80 grams of corn syrup, 20 grams of colored sand and 80 grams of powdered sugar. The materials were mixed at 20°C with the corn syrup exhibiting a viscosity of 2,100 cP.

The materials were blended using the **LabRAM II** mixer. After 30 seconds of mixing the materials were thoroughly blended with all solids loaded into the corn syrup. Final viscosity of the mixture was 350,000 cP.

The use of **RAM™** technology is perfectly suited for loading of solids into polymers and mixing highly loaded polymers once combined.

## ResonantAcoustic® Mixer Value Proposition

- Mix 10-100 times faster than traditional mixers
- Improve product quality to new levels
- Reduce or eliminate clean-up costs
- Eliminate cross-contamination
- Scale easily from development to production
- Scale up without increased processing time

# RAM Product Family

How You  
Think About  
Mixing and Processing

**ResonantAcoustic® Mixing** performance is available across the **RAM** product line, enabling results and new product development not possible with traditional mixing methods. All **RAM** products use *low-frequency acoustic mixing* at up to 100 *g*'s of acceleration of intense, low-shear mixing for:

- 10x — 100x faster processing
- Highly repeatable processing results

- Exceptional ingredient distribution
- Hazardous material compatible options
- Direct scaling from laboratory to production without increases in processing time

**Capacities (Batch Basis)**

- LabRAM™ II** - 1.1 lbs. ( 1 kg)
- OmniRAM** - 11 lbs. (5 kg)
- RAM 5** - 80 lbs. (36 kg)
- RAM 55** - 920 lbs. (419 kg)
