Powder Incorporation in Viscous Liquid

Resodyn Acoustic Mixers' second generation technology, LabRAM II, provides up to 1 kg payload capacity and advanced control features. Virtually any combination of liquids, powders, pastes, and gases can be processed faster, better, more efficiently, and more productively using the LabRAM II bench-top mixing systems and accessories. Polymer-Powder Blending with RAM

Many polymer based materials require the addition of dry materials such as powders for performance or coloration. To illustrate dry powder incorporation in a viscous liquid, colored chalk powder was blended with corn syrup. The image on the top right shows the starting materials and the image on the bottom right shows the materials after processing. The starting materials were 230 grams of corn syrup and 2.5 grams of powdered chalk. The mixing was performed at 20° C with the corn syrup exhibiting a viscosity of 2,100 cP. The materials were blended using the LabRAM II® mixer. After only 8 seconds of mixing and 9 minutes of processing under vacuum to degas the mixed material, the two ingredients were thoroughly blended and degassed with the chalk fully dispersed within the corn syrup. The use of RAM™ technology is well suited for dispersion of solids into polymers.

ResonantAcoustic® Mixer Value Proposition

- Mix 10-100 times faster than traditional mixers
- Improve product quality to new levels
- Reduce or eliminate clean-up costs
- Eliminate cross-contamination
- Scale easily from development to production
- Scale up without increased processing time

Innovative Mixing Solutions

RAM Product Family

ResonantAcoustic® Mixing performance is available across the RAM product line, enabling results and new product development not possible with traditional mixing methods. All RAM products use low-frequency acoustic mixing at up to 100 g’s of acceleration of intense, low-shear mixing for:
- 10x — 100x faster processing
- Highly repeatable processing results

- Exceptional ingredient distribution
- Hazardous material compatible options
- Direct scaling from laboratory to production without increases in processing time

Capacities (Batch Basis)
- LabRAM™ II - 1.1 lbs. (1 kg)
- OmniRAM - 11 lbs. (5 kg)
- RAM 5 - 80 lbs. (36 kg)
- RAM 55 - 920 lbs. (419 kg)
